Public Libraries Survey
Fiscal Year 2007
June 2009

## USER NOTE

The Institute of Museum and Library Services program report "Public Libraries Survey Fiscal Year 2007" contains corrections for errors in the state of Ohio. The Ohio errors related to Local Government Revenue and State Government Revenue. Revenue that actually came from local sources was incorrectly reported as coming from state sources; revenue that actually came from the state was incorrectly reported as coming from local sources. Notification was received after the report was posted on the web and printing was underway. The report and data files are now corrected. These corrections affect Tables 16, 16A, 17, 17A, 18, 18A, A8, and A9. Ohio's corrected total state operating revenues are $\$ 457.3$ million and its corrected total local operating revenues are $\$ 202.8$ million.

## Institute of Museum and Library Services

Dr. Anne-Imelda M. Radice, Director
The Institute of Museum and Library Services is the primary source of federal support for the nation's 123,000 libraries and 17,500 museums. The Institute's mission is to create strong libraries and museums that connect people to information and ideas. The Institute works at the national level and in coordination with state and local organizations to sustain heritage, culture, and knowledge; enhance learning and innovation; and support professional development. To learn more about the Institute, please visit www.imls.gov.

## Acknowledgments

Many individuals made important contributions to this report. The Institute of Museum and Library Services (IMLS) is grateful for their dedication.

Following is the list of those individuals (alphabetical by group):
U.S. Census Bureau staff:

Terri Craig, Suzanne Dorinski, Michael Freeman, Natasha Isaac, Jennifer Keng, Loretta McKenzie, Patricia O'Shea, Cynthia Ramsey, and Cindy Sheckells.

IMLS would like to extend a special thank you to members of the survey advisory groups for their help in managing the survey process. The former Public Library Statistics Steering (PLS) Committee and the current Library Statistics Working Group (LSWG) are a vital part of the survey team. Their time and effort has helped make this report a more valuable resource to the library community and the public.

Members of the former PLS Steering Committee:
Ira Bray, State Data Coordinator, California State Library
Dianne Carty, State Data Coordinator, Massachusetts Board of Library Commissioners
Denise Davis, Director, ALA Office for Research and Statistics
Kathleen "Kit" Keller, former State Data Coordinator, Nebraska Library Commission
Keith Curry Lance, RSL Research Group and former PLS Steering Committee Member
Aileen "Libby" Law, PLS Steering Committee Secretary and former South Carolina State Data Coordinator
Suzanne Miller, State Librarian and Director, Minnesota State Library Services
Frank Nelson, State Data Coordinator, Idaho Commission for Libraries
Timothy Owens, State Data Coordinator, State Library of North Carolina
Alan Zimmerman, former State Data Coordinator, Wisconsin Department of Public Instruction
Members of the current LSWG:
Dr. John Carlo Bertot, Professor and Director, Center for Library Innovation, University of Maryland Hulen Bivins, State Data Coordinator, Alabama Public Library Service Howard Boksenbaum, Chief of Library Services, Rhode Island Department of Administration Ira Bray, State Data Coordinator, California State Library
Dianne Carty, State Data Coordinator, Massachusetts Board of Library Commissioners
Denise Davis, Director, ALA Office for Research and Statistics
Martha Kyrillidou, Director of Statistics and Service Quality, Association of Research Libraries
Suzanne Miller, State Librarian and Director, Minnesota State Library Services
Frank Nelson, State Data Coordinator, Idaho Commission for Libraries
Wayne Onkst, State Librarian and Commissioner, Kentucky Department for Libraries and Archives
Timothy Owens, State Data Coordinator, State Library of North Carolina
Peggy D. Rudd, Director and Librarian, Texas State Library and Archives Commission
Dr. Carol Tenopir, Chancellor's Professor, School of Information Sciences, University of Tennessee
Chris Walker, Director of Research and Assessment, Local Initiative Support Corporation
Jan Walsh, State Librarian, Washington State Library Division

IMLS also extends sincere gratitude to the State Data Coordinators and other State Library Agency staff who provided the data for this report. Their diligent efforts result in a national data resource with an exceptionally high response rate, year after year.

## Number of Public Libraries and Population of Legal Service Area

1 Number of public libraries, population of legal service area, unduplicated population of legal service area, and official state population estimate, by state: Fiscal year 2007 ..... 20
1A Percentage distribution of public libraries, by population of legal service area and state: Fiscal year 2007 ..... 22
1B Percentage distribution of population of legal service area of public libraries, by state: Fiscal year 2007 ..... 24
Administrative Structure, Service Outlets, and Hours
2 Percentage distribution of public libraries, by type of administrative structure and state:
Fiscal year 2007 ..... 26
2A Percentage distribution of public libraries in the 50 states and the District of Columbia, by type of administrative structure and population of legal service area: Fiscal year 2007 ..... 29
3 Number of public libraries with branches and bookmobiles, and number of service outlets, by type of outlet and state: Fiscal year 2007 ..... 30
3A Number of public libraries in the 50 states and the District of Columbia, with branches and bookmobiles, and number of service outlets, by type of outlet and population of legal service area: Fiscal year 2007 ..... 33
4 Percentage distribution of public libraries, by average number of weekly public service hours per outlet and state: Fiscal year 2007 ..... 34
4A Percentage distribution of public libraries in the 50 states and the District of Columbia, by average number of weekly public service hours per outlet and population of legal service area: Fiscal year 2007 ..... 37
Legal Basis, Geographic Service Area, and Interlibrary Relationship
5 Percentage distribution of public libraries, by type of legal basis and state: Fiscal year 2007 ..... 38
5A Percentage distribution of public libraries in the 50 states and the District of Columbia, by type of legal basis and population of legal service area: Fiscal year 2007 ..... 41
6 Percentage distribution of public libraries, by type of geographic service area and state: Fiscal year 2007 ..... 42
6A Percentage distribution of public libraries in the 50 states and the District of Columbia, by type of geographic service area and population of legal service area: Fiscal year 2007 ..... 45
7 Percentage distribution of public libraries, by type of interlibrary relationship and state: Fiscal year 2007 ..... 46

7A Percentage distribution of public libraries in the 50 states and the District of Columbia, by type of interlibrary relationship and population of legal service area: Fiscal year 2007

## Library Services

8 Number of public library services and library services per capita or per 1,000 population, by type of service and state: Fiscal year 200750

8A Number of public library services and library services per capita or per 1,000 population in the 50 states and the District of Columbia, by type of service and population of legal service area: Fiscal year 200753

9 Circulation of children's materials, total and children's programs, and total and children's
program attendance in public libraries, by state: Fiscal year 2007 ..... 54

9A Circulation of children's materials, total and children's programs, and total and children's program attendance in public libraries in the 50 states and the District of Columbia, by type of service and population of legal service area: Fiscal year 200757

10 Number of public-use Internet computers in public libraries and uses of Internet computers
per year, by state: Fiscal year 2007 ..... 58

10A Number of public-use Internet computers in public libraries and uses of Internet computers per year in the 50 states and the District of Columbia, by population of legal service area: Fiscal year 200761

## Collections

11 Number of public library materials and library materials per capita or per 1,000 population, $\quad 6$.

12 Percentage distribution of public libraries, by size of print materials collection and state: $\quad 6$.
12A Percentage distribution of public libraries in the 50 states and the District of Columbia, by size of print materials collection and population of legal service area: Fiscal year 200769

13 Total, average, and median number of electronic materials in public libraries, by type of
material and state: Fiscal year 2007 ..... 70

13 A Total, average, and median number of electronic materials in public libraries in the
50 states and the District of Columbia, by type of material and population of legal service
area: Fiscal year 2007 ..... 73

## Staff

14 Number of paid full-time-equivalent (FTE) staff in public libraries, by type of position; $\quad \begin{aligned} & \text { percentage of total librarians and total staff with "ALA-MLS" degrees; and number of } \\ & \text { public libraries with "ALA-MLS" librarians, by state: Fiscal year 2007...................................... } 74\end{aligned}$
14A Number of paid full-time-equivalent (FTE) staff in public libraries, by type of position; percentage of total librarians and total staff with "ALA-MLS" degrees; and number of public libraries with "ALA-MLS" librarians in the 50 states and the District of Columbia, by population of legal service area: Fiscal year 2007.

15A Percentage distribution of public libraries in the 50 states and the District of Columbia, by number of paid full-time-equivalent (FTE) staff and population of legal service area:
Fiscal year 2007

## Operating Revenue

16 Total operating revenue of public libraries and percentage distribution of revenue, by
source of revenue and state: Fiscal year 2007 ..... 82

16A Total operating revenue of public libraries and percentage distribution of revenue in the
50 states and the District of Columbia, by source of revenue and population of legal service
area: Fiscal year 2007 ..... 85
17 Total per capita operating revenue of public libraries, by source of revenue and state: Fiscal year 2007 ..... 86
17A Total per capita operating revenue of public libraries in the 50 states and the District of Columbia, by source of revenue and population of legal service area: Fiscal year 2007 ..... 89
18 Percentage distribution of public libraries, by per capita operating revenue from local sources and state: Fiscal year 2007 ..... 90
18A Percentage distribution of public libraries in the 50 states and the District of Columbia, by per capita operating revenue from local sources and population of legal service area: Fiscal year 2007 ..... 93
Operating Expenditures
19 Total operating expenditures of public libraries and percentage distribution of expenditures, by type of expenditure and state: Fiscal year 2007 ..... 94
19A Total operating expenditures of public libraries in the 50 states and the District of Columbia and percentage distribution of expenditures, by type of expenditure and population of legal service area: Fiscal year 2007 ..... 97
20 Total per capita operating expenditures of public libraries, by type of expenditure and state: Fiscal year 2007 ..... 98
20A Total per capita operating expenditures of public libraries in the 50 states and the District of Columbia, by type of expenditure and population of legal service area: Fiscal year 2007. ..... 101
21 Total collection expenditures of public libraries and percentage distribution of expenditures, by type of expenditure and state: Fiscal year 2007 ..... 102
21A Total collection expenditures of public libraries in the 50 states and the District of Columbia and percentage distribution of expenditures, by type of expenditure and population of legal service area: Fiscal year 2007 ..... 105
22 Percentage distribution of public libraries, by total operating expenditures and state: Fiscal year 2007 ..... 106
22A Percentage distribution of public libraries in the 50 states and the District of Columbia, by total operating expenditures and population of legal service area: Fiscal year 2007 ..... 109
23 Percentage distribution of public libraries, by total per capita operating expenditures and state: Fiscal year 2007 ..... 110
23A Percentage distribution of public libraries in the 50 states and the District of Columbia, by total per capita operating expenditures and population of legal service area: Fiscal year 2007 ..... 113
Capital Revenue and Expenditures
24 Total capital revenue of public libraries and percentage distribution of revenue, by source of revenue and state: Fiscal year 2007 ..... 114
24A Total capital revenue of public libraries and percentage distribution of revenue in the 50 states and the District of Columbia, by source of revenue and population of legal service area: Fiscal year 2007 ..... 117
25 Total capital revenue of public libraries and percentage distribution of public libraries by total capital revenue category and state: Fiscal year 2007 ..... 118
25A Total capital revenue of public libraries in the 50 states and the District of Columbia and percentage distribution of public libraries, by total capital revenue category and population of legal service area: Fiscal year 2007 ..... 121
26 Total capital expenditures of public libraries and percentage distribution of public libraries by total capital expenditures category and state: Fiscal year 2007 ..... 122

26A Total capital expenditures of public libraries in the 50 states and the District of Columbia andpercentage distribution of public libraries by total capital expenditures and population of legalservice area: Fiscal year 2007125
Square Footage of Service Outlets
27 Number and square footage of single-outlet public libraries, by state: Fiscal year 2007 ..... 126
27A Number and square footage of single-outlet public libraries in the 50 states and the District of Columbia, by population of legal service area: Fiscal year 2007 ..... 129
28 Number and square footage of multiple-outlet public libraries, by type of outlet and state: Fiscal year 2007 ..... 130
28A Number and square footage of multiple-outlet public libraries in the 50 states and the District of Columbia, by type of outlet and population of legal service area: Fiscal year 2007 ..... 133
29 Number and square footage of central outlets of public libraries, by population of legal service area and state: Fiscal year 2007 ..... 134
30 Number and square footage of branch outlets of public libraries, by population of legal service area and state: Fiscal year 2007 ..... 138
Appendix A - Public Library State Ranking Tables
A1 Number of library visits and reference transactions of public libraries per capita, by state:
Fiscal year 2007 ..... 145
A2 Number of circulation transactions of public libraries per capita and interlibrary loans received per 1,000 population, by state: Fiscal year 2007 ..... 146
A3 Average number of public-use Internet computers of public libraries per stationary outlet and number per 5,000 population, by state: Fiscal year 2007 ..... 147
A4 Number of print materials of public libraries per capita and audio materials per 1,000 population, by state: Fiscal year 2007 ..... 148
A5 Number of video materials and current print serial subscriptions of public libraries per 1,000 population, by state: Fiscal year 2007 ..... 149
A6 Number of paid full-time-equivalent (FTE) staff and paid FTE librarians of public libraries per 25,000 population, by state: Fiscal year 2007 ..... 150
A7 Number of paid full-time-equivalent (FTE) librarians with "ALA-MLS" and other paid FTE staff of public libraries per 25,000 population, by state: Fiscal year 2007. ..... 151

B-1 Reporting periods of public libraries: Fiscal year 2007 ..... 157
B-2 States with public libraries with overlapping service areas: Fiscal year 2007 ..... 159

## Introduction

The Public Libraries Survey (PLS) is a voluntary survey conducted annually by the Institute of Museum and Library Services (IMLS). IMLS collects these data under the mandate in the Museum and Library Services Act of 2003 as stated in SEC. 210. The U.S. Census Bureau is the data collection agent for IMLS. The Fiscal Year (FY) 2007 survey is the $20^{\text {th }}$ in the series.

## Survey Purpose and Data Items Included in This Report

The PLS provides a national census of public libraries and their public service outlets (see Key Library Terminology below). These data are useful to federal, state, and local policymakers; library and public policy researchers; and the public, journalists, and others.

This report provides summary information about public libraries in the 50 states and the District of Columbia for state FY 2007. ${ }^{1}$ It covers service measures such as number of uses of electronic resources, number of Internet terminals used by the general public, reference transactions, interlibrary loans, circulation, library visits, children's program attendance, and circulation of children's materials. It also includes information about size of collection, staffing, operating revenue and expenditures, type of legal basis, and number and type of public library service outlets. This report is based on the final data file.

The PLS is designed as a universe survey. The survey frame consists of 9,217 public libraries ( 9,214 public libraries in the 50 states and the District of Columbia and 3 public libraries in the outlying areas of Guam, the Northern Mariana Islands, and the Virgin Islands), as identified by state library agencies. (Public libraries in two outlying areas, American Samoa and Puerto Rico, are not included in the survey frame because their state library agencies have never responded to the request for participation in the survey.) A total of 8,994 of the 9,217 public libraries in the survey frame responded to the FY 2007 PLS (with no outlying areas responding), for a unit response rate of 97.6 percent. Item response rates are included in the tables in this report. ${ }^{2}$ The data were submitted over the Internet via a web-based reporting system. (See Data Collection in Appendix B for more information.)

## Organization of This Report

This report includes the following major sections:

- Introduction
- Survey Purpose and Data Items Included in this Report
- Congressional Authorization
- Key Library Terminology
- Types of Tables Included in this Report
- History of the Public Libraries Survey
- Findings from the FY 2007 data collection
- Tables (including State Ranking Tables in Appendix A)
- Technical Notes (Appendix B)
- Survey Questionnaire (Appendix C)

[^0]
## Congressional Authorization

Two separate laws cover the protection of the confidentiality of individually identifiable information collected by the Institute of Museum and Library Services - the Privacy Act of 1974 and the E-Government Act of 2002. The Guidelines for Ensuring and Maximizing the Quality, Objectivity, Utility, and Integrity of Information Disseminated by the Institute of Museum and Library Services are prepared under the Treasury and General Government Appropriations Act for Fiscal Year 2001, Section 515(b).

IMLS will fulfill the congressional mandate in the Museum and Library Services Act of 2003 as stated in section 210. Analysis of Impact of Museum and Library Services:
'From amounts described in sections 214(c) and 275(b), the Director shall carry out and publish analyses of the impact of...library services. Such analyses-
(1) shall be conducted in ongoing consultation with-
(A) State library administrative agencies;
(B) State, regional, and national library...organizations; and
(C) other relevant agencies and organizations;
(2) shall identify national needs for, and trends of...library services provided with funds made available under subtitles $B$ and $C$...

IMLS library survey activities will be designed to address high-priority library data needs; provide consistent, reliable, complete, and accurate indicators of the status and trends of state and public libraries; and report timely, useful, and high-quality data to the U.S. Congress, the States, other education policymakers, practitioners, data users, and the general public.

## Key Library Terminology ${ }^{3}$

- Public library. A public library is an entity that is established under state enabling laws or regulations to serve a community, district, or region, and that provides at least the following: (1) an organized collection of printed or other library materials, or a combination thereof; (2) paid staff; (3) an established schedule in which services of the staff are available to the public; (4) the facilities necessary to support such a collection, staff, and schedule; and (5) that is supported in whole or in part with public funds.
- Administrative entity. An administrative entity is the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single public library service outlet, or it may have more than one public library service outlet. (Note: In this report, the term public library means an administrative entity.)
- Public library service outlet. Public libraries can have one or more outlets that provide direct service to the public. The three types of public library service outlets included in this report are central library outlets, branch library outlets, and bookmobile outlets. Information on a fourth type of outlet, books-by-mail-only outlets, was collected but omitted from this report because these outlets are not open to the public. The four outlet types are defined in Appendix C in item 709 of the definitions. Table 3 reports data concerning public library service outlets.

[^1]
## Types of Tables Included in This Report

There are 72 tables in this report: Tables 1 through 1B provide overview data, by state, about the number of public libraries and population of legal service area. Tables 2 through 28 are in sets of 2 each. The base table in each set (Tables 2 through 28) displays data for the nation as a whole and for each of the 50 states and the District of Columbia. The "A" table in each set displays the same data by 11 ranges of population of legal service area. Tables 27 through 30 include data about square footage. Appendix A includes 11 tables of state rankings. Appendix $B$ includes 2 tables that expand on the technical notes.

## History of the Public Libraries Survey

In 1985, the National Center for Education Statistics (NCES) and the American Library Association (ALA) conducted a pilot project in 15 states to assess the feasibility of a federal-state cooperative program for the collection of public library data. The project was jointly funded by NCES and the U.S. Department of Education's former Library Programs (LP) office. In 1987, the project's final report recommended the development of a nationwide data collection system. The Hawkins-Stafford Elementary and Secondary School Improvement Amendments of 1988 (P.L. 100-297) charged NCES with developing a voluntary FederalState Cooperative System (FSCS) for the annual collection of public library data. ${ }^{4}$ To carry out this mandate, a task force was formed by NCES and the National Commission on Libraries and Information Science (NCLIS), and the FSCS was established in 1988.

The first survey report in this series, Public Libraries in 50 States and the District of Columbia: 1989, which included data from 8,699 public libraries in 50 states and the District of Columbia, was released by NCES in 1991. A data file and survey report have been released annually since then. The states have always submitted their data electronically, via customized personal computer survey software through FY 2004, and via a webbased application beginning in FY 2005.

On October 1, 2007 the survey was transferred from NCES to IMLS. The FY 2006 survey was collected by NCES and released by IMLS. The FY 2007 survey is the first PLS data collection and release by IMLS.

[^2]
## Findings

## Preface

The following section provides highlights of the fiscal year 2007 Public Library Survey, comparing key elements from fiscal year 2007 to the previous fiscal year when appropriate. Information on longer-term trends ( $7-10$ years) is provided for select data elements. Most of the statistics presented in the long-term trend charts appear in per capita form; this was done because per capita metrics control for population growth and allow for standardized comparisons of change over time. In each line graph that reports dollar amounts over time, inflation was accounted for using a GDP deflator. ${ }^{5}$

## Number of Public Libraries and Population of Legal Service Area

- There were $9,214^{6}$ public libraries (administrative entities) ${ }^{7}$ in the 50 states and the District of Columbia in fiscal year (FY) 2007 (Table 1), slightly up from the 9,208 that there were in FY 2006. Public libraries are widely distributed across the United States; 98 percent of counties have at least one administrative entity or library outlet.
- Public library service areas encompass 97 percent $^{8}$ of the total population of the states and the District of Columbia in FY 2007, either in legally established geographic service areas or in areas under contract. This was the same percentage of the nation's population that was served during the prior fiscal year.
- Twelve percent of the public libraries served 73 percent of the population of legally served areas in the United States during FY 2007; each of these public libraries had a legal service area population of 50,000 or more (derived from Tables 1A and 1B).

## Service Outlets

- In FY 2007, 81 percent of public libraries had one single direct-service outlet (an outlet that provides service directly to the public) (Table 2). Nineteen percent had more than one directservice outlet. Both of these percentages are equal to their FY 2006 levels. Types of directservice outlets include central library outlets, branch library outlets, and bookmobile outlets.
- A total of 1,544 public libraries (17 percent) had one or more branch library outlets, with a total of 7,564 branch outlets (Table 3). The total number of central library outlets was 9,040 . The total number of stationary outlets (central library outlets and branch library outlets) was 16,604. Nine percent of public libraries had one or more bookmobile outlets, with a total of 808 bookmobiles.
- Ten percent of public libraries had an average number of weekly public service hours per outlet of less than 20 hours, 38 percent had weekly public service hours per outlet of 20-39 hours, and 52 percent had weekly public service hours per outlet of 40 hours or more (Table 4).

[^3]
## Legal Basis and Interlibrary Relationships

- The majority of public libraries (85 percent) are public agencies connected to some form of local government. In FY 2007, 53 percent of public libraries were part of a municipal government, 15 percent were separate government units known as library districts, 10 percent were part of a county/parish, 3 percent had multijurisdictional legal basis under an intergovernmental agreement, 2 percent were part of a school district, 1 percent were part of a city/county, and 2 percent reported their legal basis as "other". ${ }^{9}$ Fifteen percent of public libraries were operated by nonprofit associations/agencies; this means that they were privately controlled, but met the legal definition of a public library in the states in which they were located (Table 5).
- Though the majority of public libraries report single jurisdictions, many belong to broader service networks. Seventy-five percent of public libraries were members of a federation or cooperative service, while 23 percent were not. One percent served as the headquarters of a federation or cooperative service (Table 7). ${ }^{10}$

[^4]
## Library Services

Total Circulation, Interlibrary Loans, Reference Transactions, and Library Visits

- In FY 2007, total nationwide circulation of public library materials was 2.2 billion, or 7.4 materials circulated per capita; these were slight increases from the 2.1 billion total materials and 7.3 materials per capita that were circulated during FY 2006. Among the 50 states and the District of Columbia, Ohio had the highest per capita circulation at 15.9, while the District of Columbia had the lowest, at 2.5, during FY 2007 (Table 8).
- The growth in per capita circulation from FY 2006 to FY 2007 was a continuation of the steady growth that has occurred since FY 2000. Per capita circulation grew from 6.4 materials per person to 7.4 materials per person from FY 2000 to FY 2007, an increase of 16 percent (Figure 1).
- Nationwide, 49.9 million library materials were loaned by public libraries to other libraries (Table 8). There was a 14 percent increase between this figure and the FY 2006 total ( 43.7 million).
- Nationwide, reference transactions in public libraries totaled 292 million, or 1.0 reference transactions per capita (Table 8). This was a small decrease from the 295 million reference transactions that occurred during FY 2006.

- Nationwide, visits to public libraries totaled 1.4 billion, or 4.9 library visits per capita (Table 8), a small increase from the 4.8 visits per capita that were made during FY 2006. As in the case of per capita circulation, this is a continuation of a larger, longer upward trend. Per capita visitation increased from 4.2 to 4.9 between FY 1998 and FY 2007, an overall increase of 17 percent (Figure 2).

## Map 1: Per Capita Visitation in US Public Libraries, FY 2007

- Ohio had the highest per capita visitation rate at 7.6 visits per person; Mississippi had the lowest rate of visitation at 2.8 visits per person (Table 8). The states with the highest rates of library visitation were not concentrated in any particular region of the country and included the Pacific Northwest states of Washington and Oregon, the Midwestern states of lowa and Illinois, and the Northeastern states of Massachusetts and Vermont. The states with the lowest rates of per capita visitation were mostly clustered in the Southeast (Map 1).

## Children's Services

- Nationwide circulation of children's materials was 739.7 million, or 34 percent of total circulation during FY 2007. While the absolute number increased from 728.1 million the prior year, the percentage of total circulation that children's circulation comprised was basically unchanged from its FY 2006 level of 35 percent. Attendance at children's programs was 59.0 million in FY 2007, up from 57.6 million the prior year (Table 9).

## Electronic Services

- Nationwide, uses of public-use Internet terminals totaled 357 million, or 1.2 uses per capita, in FY 2007 (Table 10). ${ }^{11}$ This was a 7 percent increase in total uses from the previous year, but per capita uses remained unchanged.
- Internet terminals available for public use in public libraries nationwide numbered 208,000, or 3.6 per 5,000 people. These were increases from the previous year's figures of 196,000 total terminals and 3.4 terminals per 5,000 people. The average number of Internet terminals available for public use per stationary outlet was 12.5 (Table 10) ${ }^{12}$, a 6 percent increase from FY 2006.

[^5]- The increase in the number of Internet PCs per 5,000 people from FY 2006 to FY 2007 continued the longer term trend of providing more Internet terminals for library patrons. The number of Internet PCs per 5,000 people grew from 1.9 in FY 2000 to 3.6 in FY 2007, an increase of 89 percent (Figure 3).

## Collections

- Nationwide, public libraries had 812.5 million print materials in their collections, or 2.8 volumes per capita, in FY 2007. This was a slight increase from the nationwide total of 807.2 million print materials in FY 2006, but the number of volumes per capita remained the same. By state, the number of print materials per capita ranged from 1.5 in Arizona to 5.5 in Maine (Table 11) during FY 2007.
- Public libraries nationwide had 45.9 million audio materials in FY 2007, an 8 percent increase from the previous year. They held 46.3 million video materials in FY 2007, an increase of 6 percent over the previous fiscal year (Table 11).

## Staffing

- Public libraries had a total of 145,000 paid full-time-equivalent (FTE) staff in FY 2007, an increase of 5,000 over the previous year. There were 12.4 paid FTE staff persons per 25,000 people in FY 2007, virtually the same number as there were in FY 2006 ( 12.2 FTE), (derived from Table 14). Library staffing levels have been fairly stable during the study time period ranging from 11.9 (FY 1998) to a high of 12.4 (FY 2007) (Fig. 4).
- Librarians accounted for 33 percent of total FTE staff; 67 percent were in other positions. Over two-thirds of the librarians, or 68 percent, had master's degrees from programs of library and information studies accredited by the American Library Association (ALA-MLS degrees).
- Forty eight percent of all public libraries, or 4,408 libraries, had librarians with ALA-MLS degrees (Table 14) in FY 2007, practically the same percentage as in FY 2006.

## Operating Revenue and Expenditures

## Operating Revenue

- In FY 2007, 81.8 percent of public libraries' total operating revenue of $\$ 11.0$ billion came from local sources, 9 percent from state sources, 0.4 percent from federal sources, and 8.7 percent from other sources, such as monetary gifts and donations, interest, library fines, fees, and grants (Table 16).
- FY 2007 total operating revenue grew by 7 percent from the prior year, but the percentage distribution of operating revenue sources remained similar. Local sources comprised 81.7 percent of revenue in FY 2006 and 81.8 percent in FY 2007, while state sources of operating revenue accounted for 9.2 percent in FY 2006 and 9 percent in FY 2007. The share of operating revenue from federal and other sources also changed very little from FY 2006 to FY 2007.
- Nationwide, the average total per capita ${ }^{1}$ operating revenue for public libraries was $\$ 37.66$ in FY 2007 (Table 17). Of that, $\$ 30.81$ was from local sources, $\$ 3.39$ was from state sources, $\$ 0.16$ from federal sources, and $\$ 3.29$ from other sources.
- Per capita operating revenue from local sources was under $\$ 3.00$ for 7 percent of public libraries, $\$ 3.00$ to $\$ 14.99$ for 24.9 percent of libraries, $\$ 15.00$ to $\$ 29.99$ for 31.8 percent of libraries, and $\$ 30.00$ or more for 36.3 percent of libraries (Table 18) in FY 2007.

[^6]

- Local revenue has grown in importance as a share of overall operating revenue since FY 2001. That year, 77.3 percent of public library operating revenue came from local sources. The local contribution to operating revenue grew to 81.5 percent in FY 2004 and has more or less held steady since then, standing at 81.8 percent in FY 2007 (Figure 5). This increase in the proportion of operating revenue from local sources has been paralleled by a decrease in the proportion of funds from state sources. From FY 1998 to FY 2001, the state funding contribution held steady around 12.7 percent, but since FY 2001, the percentage has steadily fallen, down to 9 percent in FY 2007 (Figure 6). This shift occurred because of large absolute increases in operating revenue at the local level combined with absolute decreases in funding at the state level. $\$ 7.44$ billion (in 2007 dollars) came from local sources in FY 2001; by FY 2007 this figure had grown to $\$ 9$ billion. At the same time, $\$ 1.22$ billion of operating revenues were covered by states in FY 2001, but by

FY 2007, this figure had decreased to $\$ 991$ million (Figures 5 and 6). Operating revenue from federal sources ( 0.6 percent in FY 2001, 0.4 percent in FY 2007) and 'other' sources ( 9.4 percent in FY 2001, 8.7 percent in FY 2007) remained comparatively flat over the same time period.

- Total operating expenditures for public libraries were $\$ 10.2$ billion in $F Y$ 2007, up from $\$ 9.6$ billion in FY 2006. Of this, 66 percent was expended for paid staff and 13 percent for the library collection. The remaining 21 percent was used on a variety of 'Other' expenditures ${ }^{14}$ (Table 19).
- Nationwide, the average per capita operating expenditure for public libraries was $\$ 34.95$ (Table 20). The highest average per capita operating expenditure was $\$ 75.12$ (District of Columbia), and the lowest was $\$ 14.75$ (Mississippi).
- Expenditures for library collection materials in electronic format ${ }^{15}$ were 11 percent of total operating expenditures for public libraries (Table 21), up from 10 percent in FY 2006.

[^7]- Twenty five percent of public libraries had operating expenditures of less than $\$ 50,000,42$ percent expended $\$ 50,000$ to $\$ 399,999$, and 34 percent expended $\$ 400,000$ or more (Table 22 ).
- Per capita operating expenditures have trended upwards since FY 1998, rising from $\$ 29.66$ that year to their FY 2007 level of $\$ 34.95$, an increase of 18 percent (Figure 7 - these figures have been adjusted for inflation and are in 2007 dollars).

## Summary Remarks

The Public Library Survey data presented here suggests that demand for public library services is increasing over time; per person visitation and circulation have both steadily risen during the last 10 years for which data are available. Information technology resources for the public have increased steadily over the same period. The data also highlights some significant changes in key areas of library administration. Per person operating costs increased by 18 percent from FY 1998 to FY 2007. The share of operating revenues from local sources increased from 77.3 percent to 81.8 percent from FY 2001 to $F Y 2007$. At the same time, the share of operating revenue from state sources decreased from 12.7 percent to 9 percent. The FY 2007 operating revenue figures were reported before the full budgetary impact of the recent economic downturn was felt by states and localities. IMLS reports will continue to document these trends during subsequent fiscal years.

${ }^{1}$ A public library is an administrative entity, the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single public library service outlet, or it may have more than one outlet. The types of administrative structures for public libraries are reported in table 2 . See table 3 for additional information on outlets.
${ }^{2}$ The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives revenue, plus any areas served under contract for which the library is the primary service provider. The determination of this figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state available from the State Data Center or other official state sources.
${ }^{3}$ This is the total unduplicated population of those areas in the state that receive library services. The determination of this figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state. The population of unserved areas is not included in this figure.
${ }^{4}$ This is the most recent official total population figure for the state that matches the local population figures that are submitted to IMLS. The state data coordinator for the state library agency is instructed to obtain the figure annually from the State Data Center or other official state sources.
${ }^{5}$ Response rate is the percentage of libraries that reported the item.
NOTE: A state's total population of legal service area may be larger than the state's total unduplicated population of legal service area or the official state population estimate because some public libraries have overlapping service areas. Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

## $\dagger$ Not applicable.

${ }^{1}$ The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives revenue, plus any areas served under contract for which the library is the primary service provider. (See table 1.)
${ }^{2}$ Response rate is the percentage of libraries that reported population of legal service area.
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).
SOURCE: Institute of Museum and Library Services, Survey of Public Libraries in the United States, Fiscal Year 2007.

The administrative structure identifies an autonomous library entity (administrative entity) that has its own governance and funding.
${ }^{2}$ An administrative entity that serves the public directly with one central library, books-by-mail only, or one bookmobile.
${ }^{3}$ An administrative entity that serves the public directly with two or more service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail only.
${ }^{4}$ An administrative entity that serves the public directly with two or more service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail only. The administrative offices are separate from the direct service outlets and do not provide direct library services.
${ }^{5}$ Response rate is the percentage of libraries that reported administrative structure.
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

Table 3. Number of public libraries with branches and bookmobiles, and number of service outlets, by type of outlet and state: Fiscal year 2007

See notes at end of table.

Table 3. Number of public libraries with branches and bookmobiles, and number of service outlets, by type of outlet and state: Fiscal year 2007-Continued

A bookmobile is a traveling branch library. It consists of at least one of the following: (1) A truck or van that carries an organized collection of library materials; (2) A paid staff; and (3) Regularly scheduled hours (bookmobile stops) for being open to the public.
${ }^{2}$ Total stationary outlets is the sum of central and branch libraries.
${ }^{3}$ Response rate is the percentage of libraries that reported the item.
${ }^{4}$ Of the 9,214 public libraries in the 50 States and DC, 7,463 were single-outlet libraries and 1,751 were multiple-outlet libraries. Single-outlet libraries are a central library, bookmobile, or books-by-mailonly outlet. Multiple-outlet libraries have two or more direct service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail-only outlets.
NOTE: Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

| Wyoming | 23 | 0 | 13.0 | 17.4 | 30.4 | 30.4 | 8.7 | 0 | 0 | 100.0 |

${ }^{1}$ These data are derived from the total public service hours per year and the total outlets (central, branch, bookmobile, and books-by-mail) of public libraries.
${ }^{2}$ Response rate is the percentage of libraries that reported public service hours. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

Type of legal basis refers to the type of local government structure within which the library functions.
${ }^{2}$ An organized local government authorized in a state's constitution and statutes and established to provide general government for a specific concentration of population in a defined area.
${ }^{3}$ An organized local government authorized in a state's constitution and statutes and established to provide general government
${ }^{4}$ A multi-jurisdictional entity that is operated jointly by a county and a city
${ }^{5}$ A public library that is operated jointly by two or more units of local government under an intergovernmental agreement
${ }^{6}$ A public library that is privately controlled but meets the statutory definition of a public library in a given state.
${ }^{7}$ A public library that is under the legal basis of a school district.
${ }^{8}$ A local entity other than a county, municipality, township, or school district is authorized by state law to establish and operate a public library.
${ }^{9}$ This includes libraries under the legal basis of Native American Tribal Government and combined public/school libraries
${ }^{10}$ Response rate is the percentage of libraries that reported type of legal basis.
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands) SOURCE: Institute of Museum and Library Services, Survey of Public Libraries in the United States, Fiscal Year 2007.

 geographic area for which the public library was established to offer services and from which (or on behalf of which) the library derives income, and any areas under contract for which the library is the primary service provider.
${ }^{2}$ Response rate is the percentage of libraries that reported geographic service area
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state
NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in table 8 . SOURCE: Institute of Museum and Library Services, Survey of Public Libraries in the United States, Fiscal Year 2007.

${ }^{1}$ Response rate is the percentage of libraries that reported the item. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table.
${ }^{2}$ See table 8 for total circulation used in deriving percentage of total circulation.
${ }^{3}$ Per 1,000 population are based on the total unduplicated population of legal service areas.
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

| Wisconsin | 382 | 4,378 | 9.6 | 3.9 | 100.0 | 7,937 | 1.4 | 96.1 |
| Wyoming | 23 | 573 | 7.6 | 5.6 | 100.0 | 1,016 | 2.0 | 100.0 |

${ }^{1}$ The number of users (not uses) per year was reported on the survey. Survey respondents were instructed to count a user who uses the library's Internet computers three times a week as three
users. In this table, "uses" was substituted for "users" for meaningful per capita comparisons as there cannot be more "users" than the population base. Electronic resources include, but are not limited to, Internet (World Wide Web, e-mail, Telnet, other), online indexes, CD-ROM reference materials, software, and the public library online catalog
${ }^{2}$ The average per stationary outlet was calculated by dividing the total number of public-use Internet computers in central and branch outlets by the total number of such outlets. See table 3 for number of service outlets
${ }^{3}$ Per 5,000 population and per capita are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state.
${ }^{4}$ Response rate is the percentage of libraries that reported the item. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table.
NOTE: Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

${ }^{2}$ Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state.
NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in table 11 .

${ }^{1}$ The average was calculated by dividing the total number of materials of each type by the total number of public libraries.
Response rates are the percentage of libraries that reported the item. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table.
NOTE: Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands)

${ }^{1}$ Paid staff were reported in FTEs. To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40 -hour measure equals 1.50 FTEs). FTE data were reported to two decimal places but rounded to one decimal place in the table. Paid staff is one of four criteria used in the Public Libraries Survey to define a public library. Some states report public libraries that do not have paid staff but meet the definition of a public library under state law. 2"ALA-MLS": A Master's degree from a graduate library education program accredited by the American Library Association. Librarians with an "ALA-MLS" are also included in total librarians.
NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in table 14.

| 250,000 to 499,999 | 104 | 0 | 0 | 0 | 0 | 0 | 1.0 | 2.9 | 21.2 | 61.5 | 13.5 |
| 100,000 to 249,999 | 335 | 0 | 0 | 0 | 0.3 | 0.6 | 4.2 | 34.6 | 41.5 | 18.8 | 0 |
| 50,000 to 99,999 | 556 | 0 | 0 | 0.5 | 1.4 | 4.9 | 33.5 | 41.4 | 16.7 | 1.6 | 0 |
| 25,000 to 49,999 | 952 | 0.2 | 0.5 | 0.3 | 3.5 | 16.3 | 56.9 | 19.1 | 3.0 | 0.1 | 0 |
| 10,000 to 24,999 | 1,764 | 0.1 | 0.7 | 1.8 | 21.2 | 42.6 | 30.7 | 2.8 | 0 | 0 | 0 |
| 5,000 to 9,999 | 1,483 | 0 | 3.8 | 12.0 | 50.4 | 28.1 | 5.5 | 0.2 | 0 | 0 | 0 |
| 2,500 to 4,999 | 1,340 | 0.7 | 14.0 | 33.4 | 46.0 | 5.4 | 0.5 | 0 | 0 | 0 | 0 |
| 1,000 to 2,499 | 1,524 | 2.4 | 40.1 | 40.1 | 16.1 | 1.2 | 0.1 | 0 | 0 | 0 | 0 |
| Less than 1,000 | 1,072 | 6.8 | 74.9 | 14.9 | 2.9 | 0.2 | 0.3 | 0 | 0 | 0 | 0 |

${ }^{1}$ Paid staff were reported in FTEs. To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs). FTE data were reported to two decimal places. Paid staff is one of four criteria used in the Public Libraries Survey to define a public library. Some states report public libraries that do not have paid staff but meet the definition of a public library under state law.
NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rate is included in table 15.

\# Rounds to zero.
${ }^{1}$ This includes federal funds, such as Library Services and Technology Act (LSTA) funds, that are distributed to public libraries through state library agencies. Other federal funds that are used by state library agencies or library cooperatives to provide services that benefit local public libraries are not included in the table because they are not received as income by public libraries.
${ }^{2}$ This includes monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants.
${ }^{3}$ Response rate is the percentage of libraries that reported total income and/or all four sources of income. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

\# Rounds to zero.
${ }^{1}$ Per capita is based on the total unduplicated population of legal service areas.
${ }^{2}$ This includes federal funds, such as Library Services and Technology Act (LSTA) funds, that are distributed to public libraries through state library agencies. Other federal funds that are used by state library agencies or library cooperatives to provide services that benefit local public libraries are not included in the table because they are not received as income by public libraries.
${ }^{3}$ This includes monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants.
${ }^{4}$ Response rate is calculated as the number of libraries with a nonzero value for population of legal service area that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table.
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands)
SOURCE: Institute of Museum and Library Services, Survey of Public Libraries in the United States, Fiscal Year 2007.

${ }^{\mathrm{T}}$ This includes all expenditures other than those for staff and collection, such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs of computer hardware and software used to support library operations or to link to external networks, including the Internet. Includes expenditures for contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.
${ }^{2}$ Response rate is the percentage of libraries that reported total operating expenditures and/or all three types of expenditures. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table.
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

${ }^{1}$ Per capita is based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state.
${ }^{2}$ This includes all expenditures other than those for staff and collection, such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs of computer hardware and software used to support library operations or to link to external networks, including the Internet. Includes expenditures for contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.
${ }^{3}$ Response rate is calculated as the number of libraries with a nonzero value for population of legal service area that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table.
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

| 2,500 to 4,999 | 1,340 | 32.54 | 19.95 | 4.74 | 7.85 |
| 1,000 to 2,499 | 1,524 | 35.02 | 20.31 | 5.23 | 9.48 |
| Less than 1,000 | 1,072 | 43.50 | 23.24 | 7.12 | 13.14 |

${ }^{1}$ Per capita is based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state.
${ }^{2}$ This includes all expenditures other than those for staff and collection, such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs of computer hardware and software used to support library operations or to link to external networks, including the Internet. Includes expenditures for contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.
NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in table 20.

${ }^{1}$ This includes all operating expenditures for electronic (digital) materials. Types of electronic materials include e-books, e-serials (including journals), government documents, databases (including locally mounted, full text or not), electronic files, reference tools, scores, maps, or pictures in electronic or digital format, including materials digitized by the library. Electronic materials can be distributed on magnetic tape, diskettes, computer software, CD-ROM, or other portable digital carrier, and can be accessed via a computer, via access to the Internet, or by using an e-book reader. This includes expenditures for materials held locally and for remote electronic materials for which permanent or temporary access rights have been acquired. It also includes expenditures for database licenses.
${ }^{2}$ This includes all operating expenditures for other materials, such as microform, audio, video, DVD, and materials in new formats
${ }^{3}$ Response rate is the percentage of libraries that reported the item. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table.
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

| Wyoming | 23 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 21.7 | 78.3 | 100.0 |

${ }^{1}$ Per capita is based on the total unduplicated population of legal service areas.
${ }^{2}$ Response rate is calculated as the number of libraries with a nonzero value for population of legal service area that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

\# Rounds to zero.
${ }^{1}$ This includes federal funds, such as Library Services and Technology Act (LSTA) funds, that are distributed to public libraries through state library agencies. Other federal funds that are used by state library agencies or library cooperatives to provide services that benefit local public libraries are not included in the table because they are not received as income by public libraries.
${ }^{2}$ This includes monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants.
${ }^{3}$ Response rate is calculated as the number of libraries with a nonzero value for population of legal service area that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table.
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands)

${ }^{1}$ Response rate is the percentage of libraries that reported total capital expenditures. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table.
NOTE: Detail may not sum to totals because of rounding. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

$\dagger$ Not applicable.
${ }^{1}$ This is the total number of single-outlet public libraries (centrals) on the public library outlet data file
${ }^{2}$ The response rate is the total number of single-outlet public libraries (centrals) on the public library outlet data file divided by the number of singleoutlet public libraries (centrals) on the public library data file.
${ }^{3}$ The average square footage is calculated by dividing the total square footage reported by single-outlet public libraries (centrals) by the total number of such outlets reporting the data.
${ }^{4}$ Per 1,000 population data are based on the total unduplicated population of legal service areas. Only single-outlet public libraries (centrals) that reported square footage are included.
${ }^{5}$ The square footage response rate is calculated by dividing the total number of single-outlet public libraries (centrals) reporting square footage by the total number of single-outlet public libraries (centrals) on the public library outlet data file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file
NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only outlets), and missing data are not imputed. Data were not reported by the outlying areas (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands).

$\dagger$ Not applicable
This is the total number of central outlets on the public library outlet data file
${ }^{2}$ The response rate is the number of central outlets on the public library outlet data file divided by the number of centrals on the public library data file.
${ }^{3}$ The average square footage of central outlets is calculated by dividing the total square footage reported by central outlets by the total number of such outlets reporting the data
 on the public library outlet data file equals the number reported on the public library data file.
 Rico, and Virgin Islands).

- Not available.
${ }^{1}$ This is the total number of branch outlets on the public library outlet data file
${ }^{2}$ The response rate is the number of branch outlets on the public library outlet data file divided by the number of branches on the public library data file.
${ }^{3}$ The average square footage of branch outlets is calculated by dividing the total square footage reported by branch outlets by the total number of such outlets reporting the data.
 reported on the public library outlet data file equals the number reported on the public library data file.

## Appendix B-Technical Notes

## Reporting Period

The FY 2007 PLS requested data for state fiscal year 2007. In some states, the FY reporting period varies among local jurisdictions (these states are listed in the Other column in Table B-1 below). However, each public library provided data for a 12-month period. Note: The FY starting date and ending date of each public library are included on the data file.

## Calculations Included in the Tables

Percentages rather than raw numbers are used in some tables to provide a clearer picture of data patterns. Percentage distributions may not sum to 100 due to rounding. To obtain a raw number from a percentage distribution table, multiply the percentage for the item by the total for the item. (The total may be in a different table.) For example, in Table 5, the number of public libraries in the 50 states and the District of Columbia with municipal government as their legal basis is $4,865(9,214 \times 0.528)$. The percentages are rounded, so multiplying a percentage by a total may not give an exact count for a desired category.

Selected tables include per capita values for some items and per 1,000 population or per 5,000 population values for others (e.g., Tables 8 and 10). Scales (per capita, per 1,000, etc.) were selected to provide the clearest display of differences across categories in the data. The calculations are based on the total unduplicated population of legal service areas (instead of the total population of legal service areas) in order to eliminate duplicative reporting due to overlapping service areas. The state population estimate was not used as the basis for the calculations because some states have unserved populations. See Population items below for more information.

## Caveats for Using the Data

The data include imputations, at the unit and item levels, for nonresponding libraries. (See the Imputation section for a discussion of the imputation methodology.) Comparisons to data prior to FY 1992 should be made with caution, as earlier data do not include imputations for nonresponse, and the percentage of libraries responding to a given item varied widely among the states.

State data comparisons should be made with caution because of differences in reporting periods (see Table B-1) and adherence to survey definitions. The definitions used by some states in collecting data from their public libraries may not be consistent with the PLS definitions. The 1994 NCES Report on Coverage Evaluations of the Public Library Statistics Program (NCES 94-430) and the 1995 NCES Report on Evaluation of Definitions Used in the Public Library Statistics Program (NCES 95-430) address issues of consistency in definitions among states. For information on these reports, visit the NCES web site at:
http://nces.ed.gov/pubsearch/getpubcats.asp?sid=041\#052.
The District of Columbia, while not a state, is included in this report. Special care should be used in comparing data for a city to state data. Caution should also be used in comparing Hawaii's data to other states as all public library data are reported under one entity, the Hawaii State Public Library System.

## Survey Items

A few key survey items are discussed below. The definitions of items included in this report are provided in the survey questionnaire in Appendix C.

Library visits and reference transactions. Public libraries reported annual library visits and annual reference transactions based on actual counts, if available. Otherwise, annual estimates were provided based on a typical week in October, multiplied by 52.

Population items. The PLS has three population items: (1) Population of Legal Service Area for each public library, (2) Total Unduplicated Population of Legal Service Areas for each state, and (3) State Total Population Estimate. The population data are provided by the state library agency. The methods of calculation of the first two items vary significantly among states, and the state reporting periods also vary. The Total Unduplicated Population of Legal Service Areas does not include unserved areas and may vary from data provided by sources using standard methodology (e.g., the Census Bureau).

The total Population of Legal Service Area for all public libraries in a state may exceed the state's Total Unduplicated Population of Legal Service Areas or the Official State Total Population Estimate. This happens in states where there are overlaps in population of legal service areas served by individual libraries, resulting in the same population being counted twice. Twenty-six states had such overlapping service areas in FY 2007. (See following table.)

Table B-2. States with public libraries with overlapping service areas: Fiscal Year 2007

| Arkansas | Mississippi |
| :--- | :--- |
| Colorado | Nebraska |
| Connecticut | New Hampshire |
| Delaware | New Jersey |
| Florida | New York |
| Idaho | North Dakota |
| Indiana | Ohio |

| Louisiana | Rhode Island |
| Maine | South Carolina |
| Massachusetts | South Dakota |
| Michigan | Tennessee |
| Minnesota | Vermont |

SOURCE: Institute of Museum and Library Services, Survey of Public Libraries in the United States, Fiscal Year 2007.

To enable meaningful state comparisons using total Population of Legal Service Area data (for example, the number of print materials per capita), the Population of Legal Service Area data were adjusted to eliminate duplicative reporting due to overlapping service areas. The Public Library Data File includes a derived unduplicated population of legal service area figure for each library for this purpose (the variable is called POPU_UND). This value was prorated for each library by calculating the ratio of a library's Population of Legal Service Area to the state's total Population of Legal Service Area and applying the ratio to the state's Total Unduplicated Population of Legal Service Areas. (The latter item is a single, state-reported figure found on the Public Library State Summary/State Characteristics Data File; the variable is called POPU_UND on this file also.)

Paid Full-Time-Equivalent (FTE) Staff. Paid staff were reported in FTEs (Table 14). To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40 -hour measure equals 1.50 FTEs). FTE data were reported to two decimal places (rounded to one decimal place in the tables).

## Survey Universe

The PLS is designed as a universe survey. The survey frame consists of 9,217 public libraries ( 9,214 public libraries in the 50 states and the District of Columbia and 3 public libraries in the outlying areas of Guam, the Northern Mariana Islands, and the Virgin Islands), as identified by state library agencies. (Public libraries in two outlying areas, American Samoa and Puerto Rico, are not included in the survey frame because their state library agencies have never responded to the request for participation in the survey. Because their public libraries have not been identified, they are not included in the response rate calculations.) The survey frame (and the survey response rates in the next section) includes 293 public libraries that do not meet all the criteria in the FSCS Public Library Definition. (See Appendix C, item 203 of the Administrative Entity definitions for the criteria.) These libraries are included because they qualify as public libraries under state law. Military libraries that provide public library service and libraries that serve residents of institutions are not included. Data were not systematically collected from public libraries on Native American reservations, although 45 such libraries were reported.

## Survey Response

Unit response. A total of 8,994 of the 9,217 public libraries in the survey frame responded to the FY 2007 PLS (with no outlying areas responding), for a unit response rate of 97.6 percent. Respondents to the survey are defined as public libraries for which the following data were reported: population of the legal service area and at least three of the five following items: total paid employees, total operating revenue, total operating expenditures, print materials, and total circulation. (Note: Some individual survey items, such as population of legal service area, service outlets, and type of legal basis have a 100.0 percent response rate for their state because the state library agency provided this data for all public libraries in their state.)

Total response. The base for calculating response rates to individual survey items is the total number of libraries in the survey frame, including unit nonrespondents.

Data File and Publication Response Rates. The total response rates on the data file differ from the total response rates in the published report because the outlying areas of Guam, the Northern Mariana Islands, and the Virgin Islands are included on the data file. However, since the outlying areas were nonrespondents, they are not included in the published reports.

## Data Collection

The FY 2007 PLS was released to the states over the Internet on December 12, 2007. States were placed into one of three reporting groups (with survey due dates of April 16, July 30, or August 27, 2008), based on their fiscal cycles or claim of extraordinary reporting hardship. States reported their data over the Internet via a webbased reporting system called WebPLUS (Web Public Library Universe System). WebPLUS was developed by the Census Bureau (the data collection agent). Edit follow-up was completed in December of 2008. The editing process is described below.

## Editing

State level. The respondent generates an edit report following direct data entry or import of their data into WebPLUS. The edit report, which can be viewed on-screen or printed, is used to identify and correct any errors, and to confirm the accuracy of data that generated edit warnings but required no change, before submitting the final file to the Census Bureau. In the FY 2007 PLS, four types of edit checks were performed:

1. Relational edit checks. This is a data consistency check between related data elements. For example, an edit message is generated if the number of "ALA-MLS" Librarians (librarians with master's degrees from programs of library and information studies accredited by the American Library Association) is greater than "Total Librarians."
2. Out-of-range edit checks. This is a range check that compares the data reported for an item to the "acceptable range" of numeric values for the item. For example, an edit message is generated if average Public Service Hours per outlet per week is less than 11.16 or greater than 129.67, or if the current year/past year change in Children's Circulation is less than 0.30 or greater than 3.44 .
3. Arithmetic edit checks. This is an arithmetical accuracy check of a reported total and its parts to the generated total. For example, an edit message is generated if Total Operating Revenue is not equal to the sum of its parts (Local Government Revenue, State Government Revenue, Federal Government Revenue, and Other Revenue).
4. Blank, zero, or invalid data edit checks. This is a check of reported data against acceptable values. For example, an edit message is generated if the Reporting Period Start Date is missing, or Print Materials is 0 , or the Legal Basis Code is not a valid code.

The WebPLUS application generates state summary tables (showing state totals for all numeric data items) and single-library tables (showing data for individual public libraries in a state). Respondents were encouraged to review the tables for data quality issues before submitting their data. State data submissions also included a signed form from the Chief Officer of the State Library Agency certifying the accuracy of the data.

National level. The Census Bureau and IMLS reviewed and edited the state data submissions, working closely with the PLS State Data Coordinators.

## Imputation

When responses are submitted for processing, sometimes answers are not given for every data item. In order to make complete datasets for constructing estimates of totals, we need to impute for the missing data items. This section describes the imputation methods that were used to fill in for the missing data.

All libraries, including nonresponding libraries, were sorted into imputation cells based on the region and size of population served. Imputations for nonresponding libraries were performed using the data calculated from respondents in their imputation cells. Item imputation was performed on each record with nonresponse variables. The data are identified as either imputed or reported on the survey data file through the use of imputation codes. The following imputation rules were applied:

## A. For libraries that responded in FY 2006 but not FY 2007 (or in FY 2005 but not in FY 2006 or FY 2007):

A1. The mean growth rates (Method 1) were calculated for institutions that reported in both FY 2006 and FY 2007 (or in both FY 2005 and FY 2007). The average rate was calculated for each imputation cell.

A2. The average change rates computed in Step A1 were applied to the FY 2006 data (or FY 2005 data) of FY 2007 nonresponding libraries to obtain an imputation for FY 2007.

Method 1 was used for imputing centrals, branches, bookmobiles, ALA-MLS librarians, total librarians, other paid employees, print materials, current print serial subscriptions, audio, public service hours, library visits, reference transactions, capital revenue, databases, electronic books, current electronic serial subscriptions, total circulation, total staff expenditures, total collection expenditures, total operating expenditures, total library programs, children's library programs, total program attendance and total expenditures.

A3. Other operating expenditures was derived by subtracting total operating expenditures from the sum of total collection expenditures and total staff expenditures imputed in Step A2.

A4. The hot-deck growth rate (Method 2) was used for imputing revenue variables (i.e., other revenue and revenue from federal, state, and local government sources). Both responding and nonresponding libraries in an imputation cell were arranged in decreasing order of size of population served. A nonresponding library's FY 2006 (or FY 2005) data were pulled forward, and a growth rate was determined by calculating the growth of the next smallest library to the nonresponding library that had data for both FY 2007 and FY 2006 (or FY 2007 and FY 2005). This hot-deck growth rate method was applied to the nonresponding library's FY 2006 (or FY 2005) data to obtain an estimate for FY 2007. If no prior year growth rate was available for the next smallest library, the growth rate was assumed to be 1.00 .

A5. Total operating revenue was derived by adding revenue from federal, state, and local sources and other revenue. Total paid employees was derived by adding librarians and other paid employees.

A6. Children's program attendance was imputed by multiplying the current-year total library visits by the prior-year ratio of children's program attendance to total library visits.

A7. Children's circulation was imputed by multiplying the current-year total circulation by the prior-year ratio of children's circulation to total circulation.

A8. Electronic materials expenditures was set to zero if the total of collection expenditures was equal to zero.

A9. For general public Internet terminals, if there were FY 2006 or FY 2005 reported data, the data were carried forward as an imputation for FY 2007.

A10. For population variables, the prior year data were carried forward in the current year.

A11. The electronic users variable was imputed by multiplying the current-year general public Internet terminals by the prior-year (FY 2006 or FY 2005) ratio of electronic users to general public Internet terminals.

A12. Salaries data were derived by multiplying the total staff expenditures (reported or imputed by Step A2), by the cell median ratio of salaries to total staff expenditures.

A13. Employee benefits was derived by subtracting salaries (reported or imputed by Step A12) from the total staff expenditures (reported or imputed by Step A2).

A14. Print materials expenditures data were derived by multiplying total collection expenditures (reported or imputed in Step A2), by the prior year ratio of print materials expenditures to total collection expenditures. If total collection expenditures could not be used then total operating expenditures was substituted for that variable.

A15. Other materials expenditures data were derived by multiplying total collection expenditures (reported or imputed in Step A2), by the prior year ratio of other materials expenditures to total collection expenditures if total collection expenditures data were imputed. If total collection expenditures could not be used then total operating expenditures was substituted for that variable.

A16. Other materials expenditures data were derived by subtracting the sum of print materials expenditures and electronic materials expenditures from total collection expenditures if total collection expenditures data were reported.

A17. Capital revenue was derived by multiplying capital expenditures times the prior year ratio of capital revenue to capital expenditures.

A18. Federal government capital revenue, state government capital revenue, and local government capital revenue were derived by multiplying total capital revenue by the prior year ratio of federal government capital revenue, state government capital revenue, or local government capital revenue to total capital revenue.

A19. Total library programs and children's library programs were imputed to be zero if total library programs attendance was zero.

A20. Total library programs and children's library programs were derived by multiplying total library program attendance by the prior year ratio of total library programs or children's library programs to total library programs attendance.

A21. Total library program attendance was derived by multiplying total library programs by the ratio of children's library program attendance to children's library programs.

## B. For libraries with no reported data in FY 2005, FY 2006, or FY 2007:

B1. Method 1 (described in Steps A1 and A2) was used to impute for FY 2007 if the prior year data (FY 2006 or FY 2005) were imputed using prior year reported data and the imputed value was greater than zero.

This method was used for imputing centrals, branches, bookmobiles, ALA-MLS librarians, total librarians, other paid employees, print materials, current print serial subscriptions, audio, public service hours, reference transactions, total circulation, other revenue, revenue from federal, state, and local sources, total staff expenditures, total collection expenditures, other operating expenditures, and electronic materials expenditures.

B2. The mean of the imputation cell was calculated for all libraries that responded in FY 2007. For every nonrespondent that did not have prior year reported data, the cell mean was adjusted for the size of a nonresponding library by multiplying it by the ratio of the nonrespondent's total population served to the mean size of population served for all responding libraries.

This method was used for imputing centrals, branches, bookmobiles, ALA-MLS librarians, total librarians, other paid employees, print materials, current print serial subscriptions, current electronic serial subscriptions, audio, public service hours, reference transactions, total circulation, other revenue, revenue from federal, state, and local sources, salaries, total staff expenditures, total collection expenditures, other operating expenditures, and electronic materials expenditures.

B3. To impute total library visits when the prior year imputed data were not based on reported data, library visits was summed over all responding libraries in an imputation cell, as was the population served. The ratio of total library visits to total population served was multiplied by the nonrespondent's population value to estimate the nonrespondent's library visits.

B4. Children's program attendance was imputed using the method described in Step B3 where the ratio of total children's program attendance to total library visits for the responding libraries in an imputation cell was multiplied by the nonrespondent's current-year library visits.

B5. Children's circulation was imputed by calculating the ratio of children's circulation to total circulation for the responding libraries in an imputation cell and multiplying the ratio by the current-year total circulation of the nonresponding library.

B6. Total staff expenditures was derived by adding salaries and employee benefits determined in Step B1 (or Step B2). Total operating revenue was derived by adding revenue from federal, state, and local sources and other revenue. Total paid employees was derived by adding librarians and other paid employees.

B7. Total operating expenditures was derived by summing total collection expenditures, total staff expenditures, and other operating expenditures imputed in Step B1 (or Step B2).

B8. The median of the imputation cell was calculated for all libraries that responded in FY 2007. The cell median was not adjusted. This method was used for imputing general public Internet terminals when there was no reported prior year (FY 2006 or FY 2005) data. If the cell median was zero but based on the value of other electronic data items it was determined that the value should be greater than zero then the imputed value was equal to the unadjusted cell mean.

B9. The median ratio of electronic users to general public terminals was used to impute electronic users when there were no reported (FY 2006 or FY 2005) data.

B10. The median of the imputation cell was calculated for all libraries that responded in FY 2007. The cell median was adjusted for the size of a nonresponding library by multiplying it by the ratio of the nonrespondent's total population served to the mean size of population served for all responding libraries.

This method was used for imputing print materials expenditures, other materials expenditures, capital revenue, electronic books, and databases.

B11. Federal government capital revenue or local government capital revenue was derived by multiplying total capital revenue by the median ratio of federal government capital revenue or local government capital revenue to total capital revenue.

B12. State government capital revenue was derived by multiplying total capital revenue by the mean ratio of state government capital revenue to total capital revenue.

B13. Other capital revenue is imputed as the difference between total capital revenue and the detail (federal government capital revenue + local government capital revenue). If the value is negative it is changed to be zero and the detail is proportionately distributed to equal the total.

B14. Total library programs and children's library programs were imputed to be total library program attendance multiplied by the median ratio of total library programs or children's library programs to total library program attendance.

## C. For all nonresponding libraries:

C1. Total capital expenditures was derived by imputing total expenditures (a derived variable which is the sum of total collections expenditures, total staff expenditures, other operating expenditures, and total capital expenditures) and subtracting total operating expenditures in order to get total capital expenditures. If the derived total capital expenditures had a negative value, it was changed to zero, the total operating expenditures value was changed to equal total expenditures, and total collection expenditures, total staff expenditures, and other operating expenditures were adjusted so that the sum would equal total operating expenditures. Alternatively, the cell mean (adjusted for population size) was used.

C2. The mean of the imputation cell was used to impute videos and interlibrary loans. The cell mean was adjusted for the size of a nonresponding library by multiplying it by the ratio of the nonrespondent's total population served to the mean size of population served for all responding libraries.

## Nonsampling Errors

Since all units in the universe are surveyed, the data are not subject to sampling error, but they are subject to nonsampling errors, such as errors in response, nonresponse errors, coverage errors arising from an incomplete listing of public libraries, coding errors, or processing errors.

Every effort is made to mitigate such errors. The editing efforts described above are designed to decrease the number of errors due to inaccurate response or due to processing problems. Imputation lessens the effect of nonresponse. Efforts are made to obtain complete listings of public libraries from the state library agencies. Although such efforts are made, some nonsampling error likely remains in the data.

## Appendix C-Survey Questionnaire

| State Characteristics |  |  |  |
| :--- | :--- | :--- | :--- |
| Item No. | Item | Current Year | Prior Year |

## State Characteristics Data Element Definitions

Note: The items below are answered by the state library agency.
Data Element Name
Reporting Period Starting Date

Reporting Period Ending Date

Official State Total Population Estimate

## Data Element Definition

This is the earliest date (month and year) for a 12-month period that applies to the state's data being submitted to IMLS.

Note: Reporting period means data for the fiscal year that ended in the previous calendar year. If data are collected for different local reporting periods, provide the earliest starting date.

This is the latest date (month and year) for a 12-month period that applies to the state's data being submitted to IMLS.

Note: Reporting period means data for the fiscal year that ended in the previous calendar year. If data are collected for different local reporting periods, provide the latest ending date.

This is the most recent official total population figure for your state that matches the local population figures that you are submitting to IMLS. The State Data Coordinator should obtain this figure annually from the State Data Center or other official state sources.

This is the total unduplicated population of those areas in your state that receive library services. The population of unserved areas is not included in this figure.

Note: A state's actual total population of legal service areas may be different from the total population of legal service areas as calculated by WebPLUS. This happens in states where there are overlaps in population of legal service areas served by individual libraries, resulting in the same population being counted twice in the WebPLUS calculation. For states that have no overlapping jurisdictions, this number will be identical to your state's total population of legal service areas as calculated by WebPLUS. For states that do have overlaps in population of legal service areas served by individual libraries, this number must be calculated separately.

Use your state's most recent official state population figures for jurisdictions in your state as the basis for calculating the total unduplicated population of legal service areas.

## Administrative Entity Data Element Definitions

Administrative Entity. (This is not a WebPLUS Data Element.) This is the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single outlet, or it may have more than one outlet.

## \# Data Element Name <br> 150 FSCS ID (Automatic Display) <br> Name

## Data Element Definition

This is the identification code assigned by WebPLUS to the administrative entity.

This is the state-assigned identification code for the administrative entity.
This is the legal name of the administrative entity.
Note: Provide the name of the public library. Do not use acronyms. Do not abbreviate the name unless it exceeds the WebPLUS field length of 60 characters. Avoid abbreviations at the beginning of the name and do not punctuate abbreviations. (See Standard Abbreviations for WebPLUS in Appendix I.)

This is the complete street address of the administrative entity.
Note: Do not report a post office box or general delivery.

This is the city or town in which the administrative entity is located.
This is the standard five-digit postal zip code for the street address of the administrative entity.

This is the four-digit postal ZIP code extension for the street address of the administrative entity.

## Mailing Address

Mailing Address

City (of mailing address)
ZIP Code (of mailing address)

ZIP+4 (of mailing address)

County of the Entity

This is the mailing address of the administrative entity.
This is the city or town of the mailing address for the administrative entity.
This is the standard five-digit postal ZIP code for the mailing address of the administrative entity.

This is the four-digit postal ZIP code extension for the mailing address of the administrative entity.

This is the county in which the headquarters of the administrative entity is located.

Phone This is the telephone number of the administrative entity, including area code.

Note: Report telephone number without spacing or punctuation. If the Administrative Entity has no phone, enter " -3 " (for Not Applicable).

This is the Web address of the administrative entity. http://

Note: If the Administrative Entity has no web address, enter " -3 " (for Not Applicable).

Select one of the following:
HQ—Headquarters of a Federation or Cooperative. The library or entity that provides the physical space and staff who manage, coordinate, or administer the programs of the federation or cooperative.

Note: Agencies that serve other libraries rather than the public should not be reported to FSCS.

ME-Member of a Federation or Cooperative. An autonomous library joined by formal or informal agreement(s) with (a) other autonomous libraries in the same state to perform various services cooperatively, such as resource sharing, communications, etc., and (b) libraries that are part of national, multi-state or statewide library federations or cooperatives. (Do not include OCLC.) Do not include multiple-outlet administrative entities (e.g., libraries with branches and that have the word "system" in their legal name) if the entity does not have an agreement with another autonomous library.

NO—Not a Member of a Federation or Cooperative.
The legal basis is the type of local government structure within which the entity functions. It reflects the state or local law, which authorizes the library.

Select one of the following:
CC-City/County. A multi-jurisdictional entity that is operated jointly by a county and a city.

Cl—Municipal Government (city, town or village). A municipal government is an organized local government authorized in a state's constitution and statutes and established to provide general government for a specific concentration of population in a defined area.

CO-County/Parish. An organized local government authorized in a state's constitution and statutes and established to provide general government.

LD-Library District. A library district is a local entity other than a county, municipality, township, or school district that is authorized by state law to establish and operate a public library as defined by FSCS. It has sufficient administrative and fiscal autonomy to qualify as a separate government. Fiscal autonomy requires support from local taxation dedicated to library purposes (e.g., a library tax).

MJ—Multi-jurisdictional. An entity operated jointly by two or more units of local government under an intergovernmental agreement which creates a jointly appointed board or similar means of joint governance; to be distinguished from a library which contracts to serve other jurisdictions and from special library districts.

Note: Please put city/county combinations under 'CC', rather than under Multi-jurisdictional.

NL—Native American Tribal Government. An organized local government authorized and established to provide general government to residents of a Native American reservation.

Note: Include native Alaskan villages in this category.
NP—Non-profit Association or Agency. An entity privately controlled but meeting the statutory definition of a public library in a given state; includes association libraries.

SD-School District. An organized local entity providing public elementary, secondary, and/or higher education which, under state law, has sufficient administrative and fiscal autonomy to qualify as a separate government. Excludes "dependent public school systems" of county, municipal, township, or state governments.

OT-Other.

This code identifies an autonomous library entity (administrative entity) that has its own governance and funding.

An administrative entity is the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single outlet, or it may have more than one outlet.

Select one of the following:
MA—Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are separate. An administrative entity that serves the public directly with two or more service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-bymail only. The administrative offices are separate from the direct service outlets and do not provide direct library services.

MO—Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are Not Separate. An administrative entity that serves the public directly with two or more service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail only.

SO—Administrative Entity with a Single Direct Service Outlet. An administrative entity that serves the public directly with one central library, books-by-mail only, or one bookmobile.

FSCS Public Library Definition
Answer < $\mathrm{Y}>$ es or <N>o to the following question: "Does this public library meet all the criteria of the FSCS public library definition?"

A public library is an entity that is established under state enabling laws or regulations to serve a community, district, or region, and that provides at least the following:

1. An organized collection of printed or other library materials, or a combination thereof;
2. Paid staff;
3. An established schedule in which services of the staff are available to the public;
4. The facilities necessary to support such a collection, staff, and schedule; and
5. Is supported in whole or in part with public funds.

Note: If the library meets all of the requirements of this definition, respond with a <Y>es. If the library does not meet one or more of the requirements, respond with $\mathrm{a}<\mathrm{N}>0$.

Choose from among the following types of readily available Census Bureau geography, one code that either exactly or most nearly describes the geographic area for which the public library has been established to offer services and from which (or on behalf of which) the library derives revenue, plus any areas served under contract for which the library is the primary service provider.

Note: The Population of Legal Service Area (data element \#208) should be reflected in the geographic code selected. For further clarification of municipal government, county/parish, and school district, refer to definitions under Legal Basis Code (data element \#201). For further clarification of metropolitan area, see Metropolitan Status Code "NCMetropolitan Area, but Not Within Central City Limits" (data element \#710—Outlet Data Element Definitions).

Legal Service Area Boundary Change

Reporting Period Ending Date

Population of the Legal Service Area

CI1—Municipal Government (city, town or village) (exactly)

CO1-County/Parish (exactly)
CO2—County/Parish (most nearly)
MA1-Metropolitan Area (exactly)
MA2-Metropolitan Area (most nearly)
MC1-Multi-County (exactly)
MC2-Multi-County (most nearly)
SD1—School District (exactly)
SD2-School District (most nearly)
OTH-Other

Answer < $\mathrm{Y}>\mathrm{es}$ or <N>o to the following question: "Did the administrative entity's legal service area boundaries change since last year?"

Note: Changes are likely to result, for example, when a municipality annexes land, when one municipality in a county becomes either an independent city or its own county necessitating its exclusion from the first county's geography, or when an administrative entity contracts to provide public library service for some additional geographic area other than the geographic area for which it was established (e.g., a municipal library contracts to serve county residents).

This is the starting date (month, day, and year) for a 12-month period that applies to the administrative entity's data being submitted to IMLS.

Note: Reporting period means data for the fiscal year that ended in the previous calendar year.

This is the ending date (month, day, and year) for a 12-month period that applies to the administrative entity's data being submitted to IMLS.

Note: Reporting period means data for the fiscal year that ended in the previous calendar year.

The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives revenue, plus any areas served under contract for which the library is the primary service provider.

Note: The determination of this population figure shall be the responsibility of the state library agency. This population figure should be based on the most recent official state population figures for jurisdictions in your state available from the State Data Center. The State Data Coordinator should obtain these figures annually from the State Data Center or other official state sources.

This is one type of single outlet library (SO) or the library, which is the operational center of a multiple-outlet library (MO or MA). Usually all processing is centralized here and the principal collections are housed here. Synonymous with main library.

Note: Each administrative entity may report either no central library or one central library. No administrative entity may report more than one central library. In the administrative entity file, this simply means reporting " 0 " or " 1 " for central library. Where two or more libraries are considered "centrals" for state or local purposes, one central library and one or more branch libraries should be reported. If you wish to identify a central library in the outlet file, identify the library with the largest collection as the central library, and report all others as branches. Where there are several coequal outlets and no principal collection, report all such outlets as branches, not central libraries.

A branch library is an auxiliary unit of an administrative entity which has at least all of the following:

1. Separate quarters;
2. An organized collection of library materials;
3. Paid staff; and
4. Regularly scheduled hours for being open to the public.

A bookmobile is a traveling branch library. It consists of at least all of the following:

1. A truck or van that carries an organized collection of library materials;
2. Paid staff; and
3. Regularly scheduled hours (bookmobile stops) for being open to the public.

Note: Count the number of vehicles in use, not the number of stops the vehicle makes.

## PAID STAFF (FULL-TIME EQUIVALENT)

Report figures as of the last day of the fiscal year. Include all positions funded in the library's budget whether those positions are filled or not. To ensure comparable data, 40 hours per week has been set as the measure of full-time employment (FTE). For example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs.

## ALA-MLS

Total Librarians

Librarians with Master's degrees from programs of library and information studies accredited by the American Library Association.

Persons with the title of librarian who do paid work that usually requires professional training and skill in the theoretical or scientific aspects of library work, or both, as distinct from its mechanical or clerical aspect. This data element also includes ALA-MLS (data element \#250).

This includes all other FTE employees paid from the reporting unit budget, including plant operations, security, and maintenance staff.

## OPERATING REVENUE

Report revenue used for operating expenditures as defined below. Include federal, state, local, or other grants. DO NOT include revenue for major capital expenditures, contributions to endowments, revenue passed through to another agency (e.g., fines), or funds unspent in the previous fiscal year (e.g., carryover). (Funds transferred from one public library to another public library should be reported by only one of the public libraries. The State Data Coordinator shall determine which library will report these funds.)

300 Local Government Revenue

State Government Revenue

Federal Government Revenue

Other Operating Revenue

Total Operating Revenue

This includes all local government funds designated by the community, district, or region and available for expenditure by the public library. Do not include the value of any contributed or in-kind services or the value of any gifts and donations, library fines, fees, or grants.

Do not include state, federal, and other funds passed through local government for library use. Report these funds with state government revenue or federal government revenue, as appropriate.

These are all funds distributed to public libraries by state government for expenditure by the public libraries, except for federal money distributed by the state. This includes funds from such sources as penal fines, license fees, and mineral rights.

Note: If operating revenue from consolidated taxes is the result of state legislation, the revenue should be reported under state revenue (even though the revenue may be from multiple sources).

This includes all federal government funds distributed to public libraries for expenditure by the public libraries, including federal money distributed by the state.

This is all operating revenue other than that reported under local, state, and federal (data elements \#300, \#301, and \#302). Include, for example, monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants. Do not include the value of any contributed or in-kind services or the value of any non-monetary gifts and donations.

This is the sum of Local Government Revenue, State Government Revenue, Federal Government Revenue, and Other Operating Revenue (data elements \#300 through \#303).

## OPERATING EXPENDITURES

Operating expenditures are the current and recurrent costs necessary to support the provision of library services. Significant costs, especially benefits and salaries, that are paid by other taxing agencies (government agencies with the authority to levy taxes) "on behalf of" the library may be included if the information is available to the reporting agency. Only such funds that are supported by expenditure documents (such as invoices, contracts, payroll records, etc.) at the point of disbursement should be included. Do not report the value of free items as expenditures. Do not report estimated costs as expenditures. Do not report capital expenditures under this category.

## Staff Expenditures

Salaries \& Wages Expenditures
This includes salaries and wages for all library staff (including plant operations, security, and maintenance staff) for the fiscal year. Include salaries and wages before deductions but exclude employee benefits.

These are the benefits outside of salaries and wages paid and accruing to employees (including plant operations, security, and maintenance staff), regardless of whether the benefits or equivalent cash options are available to all employees. Include amounts for direct paid employee benefits including Social Security, retirement, medical insurance, life insurance, guaranteed disability income protection, unemployment compensation, workmen's compensation, tuition, and housing benefits.

This is the sum of Salaries \& Wages Expenditures and Employee Benefits Expenditures (data elements \#350 and \#351).

## Collection Expenditures

This includes all operating expenditures from the library budget for all materials in print, microform, electronic, and other formats considered part of the collection, whether purchased, leased, or licensed. Exclude charges or fees for interlibrary loans and expenditures for document delivery.

353 Print Materials Expenditures Report all operating expenditures for the following print materials: books, serial back files, current serial subscriptions, government documents, and any other print acquisitions.

Report all operating expenditures for electronic (digital) materials. Types of electronic materials include e-books, e-serials (including journals), government documents, databases (including locally mounted, full text or not), electronic files, reference tools, scores, maps, or pictures in electronic or digital format, including materials digitized by the library. Electronic materials can be distributed on magnetic tape, diskettes, computer software, CD-ROM, or other portable digital carrier, and can be accessed via a computer, via access to the Internet, or by using an e-book reader. Include expenditures for materials held locally and for remote materials for which permanent or temporary access rights have been acquired. Include expenditures for database licenses. [Note: Based on ISO 2789 definition.]

Other Materials Expenditures

Total Collection Expenditures

Other Operating Expenditures

## CAPITAL REVENUE

Report all revenue to be used for major capital expenditures, by source of revenue. Include funds received for (a) site acquisition; (b) new buildings; (c) additions to or renovation of library buildings; (d) furnishings, equipment, and initial collections (print, non-print, and electronic) for new buildings, building additions, or building renovations; (e) computer hardware and software used to support library operations, to link to networks, or to run information products; (f) new vehicles; and (g) other one-time major projects. Exclude revenue to be used for replacement and repair of existing furnishings and equipment, regular purchase of library materials, and investments for capital appreciation. Exclude income passed through to another agency (e.g., fines), or funds unspent in the previous fiscal year (e.g., carryover). Funds transferred from one public library to another public library should be reported by only one of the public libraries. Report federal, state, local, and other revenue to be used for major capital expenditures in the following categories:

400 Local Government Capital

Revenue

State Government Capital Revenue

Federal Government Capital Revenue

Total Operating Expenditures
Note: Expenditures for computer software used to support library operations or to link to external networks, including the Internet, are reported under Other Operating Expenditures (data element \#357).

Report all operating expenditures for other materials, such as microform, audio, video, DVD, and materials in new formats.

This is the sum of Print Materials Expenditures, Electronic Materials Expenditures, and Other Materials Expenditures (data elements \#353, \#354, and \#355).

This includes all expenditures other than those reported for Total Staff Expenditures (data element \#352) and Total Collection Expenditures (data element \#356).

Note: Include expenses such as binding, supplies, repair or replacement of existing furnishings and equipment; and costs of computer hardware and software used to support library operations or to link to external networks, including the Internet. Report contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.

This is the sum of Total Staff Expenditures, Total Collection Expenditures, and Other Operating Expenditures (data elements \#352, \#356, and \#357).

Report all governmental funds designated by the community, district, or region and available to the public library for the purpose of major capital expenditures, except for state and/or federal money distributed by the local government.

Report all funds distributed to public libraries by state government for expenditure by the public libraries for the purpose of major capital expenditures, except for federal money distributed by the state.

Report federal governmental funds, including federal funds distributed by the state or locality, and grants and aid received by the library for the purpose of major capital expenditures.

Report private (non-governmental funds), including grants received by the library for the purpose of major capital expenditures.

This is the sum of Local Government Capital Revenue, State Government Capital Revenue, Federal Government Capital Revenue, and Other Capital Revenue (data elements \#400 through \#403)

Note: The amounts reported for Total Capital Revenue and Total Capital Expenditures are not expected to be equal.

## CAPITAL EXPENDITURES

Report major capital expenditures (the acquisition of or additions to fixed assets). Examples include expenditures for (a) site acquisitions; (b) new buildings; (c) additions to or renovation of library buildings; (d) furnishings, equipment, and initial book stock for new buildings, building additions, or building renovations; (e) library automation systems; (f) new vehicles; and (g) other one-time major projects. Include federal, state, local, or other revenue used for major capital expenditures. Only funds that are supported by expenditure documents (e.g., invoices, contracts, payroll records, etc.) at the point of disbursement should be included. Estimated costs are not included. Exclude expenditures for replacement and repair of existing furnishings and equipment, regular purchase of library materials, and investments for capital appreciation. Exclude contributions to endowments, or revenue passed through to another agency (e.g., fines). Funds transferred from one public library to another public library should be reported by only one of the public libraries.

## LIBRARY COLLECTION

This section of the survey collects data on selected types of materials. It does not cover all materials (i.e., microform, scores, maps, and pictures) for which expenditures are reported under Print Materials Expenditures, Electronic Materials Expenditures, and Other Materials Expenditures (data elements \#353, \#354, and \#355). Under this category report only items the library has acquired as part of the collection and catalogued, whether purchased, leased, licensed, or donated as gifts.

Report a single figure that includes both of the following:

1. Books in print. Books are non-serial printed publications (including music and maps) that are bound in hard or soft covers, or in loose-leaf format. Include non-serial government documents. Report the number of physical units, including duplicates. For smaller libraries, if volume data are not available, count the number of titles. Books packaged together as a unit (e.g., a 2-volume set) and checked out as a unit are counted as one physical unit.

451 Electronic Books (E-Books)

Audio

Video
2. Serial back files in print. Serials are publications issued in successive parts, usually at regular intervals, that are intended to be continued indefinitely. Serials include periodicals (magazines); newspapers; annuals (reports, yearbooks, etc.); journals, memoirs, proceedings, and transactions of societies; and numbered monographic series. Government documents and reference tools are often issued as serials. Except for the current volume, count unbound serials as a volume when the library has at least half of the issues in a publisher's volume. Report the number of physical units, including duplicates. For smaller libraries, if volume data are not available, count the number of titles. Serials packaged together as a unit (e.g., a 2 -volume serial monograph) and checked out as a unit are counted as one physical unit.

E-books are digital documents (including those digitized by the library), licensed or not, where searchable text is prevalent, and which can be seen in analogy to a printed book (monograph). Include non-serial government documents. E-books are loaned to users on portable devices (e-book readers) or by transmitting the contents to the user's personal computer for a limited time. Include e-books held locally and remote e-books for which permanent or temporary access rights have been acquired. Report the number of physical or electronic units, including duplicates, for all outlets. For smaller libraries, if volume data are not available, the number of titles may be counted. E-books packaged together as a unit (e.g., multiple titles on a single e-book reader) and checked out as a unit are counted as one unit.

Note: Under this category report only items the library has selected as part of the collection and made accessible through the library's Online Public Access Catalog (OPAC).

These are materials on which sounds (only) are stored (recorded) and that can be reproduced (played back) mechanically, electronically, or both. Include records, audiocassettes, audio cartridges, audio discs (including audio-CD-ROMs), audio-reels, talking books, and other sound recordings.

Report the number of physical units, including duplicates. For smaller libraries, if physical unit data are not available, count the number of titles. Items packaged together as a unit (e.g., two audiocassettes for one recorded book) and checked out as a unit are counted as one physical unit.

These are materials on which moving pictures are recorded, with or without sound. Electronic playback reproduces pictures, with or without sound, using a television receiver or monitor. Video formats may include tape, DVD, CD-ROM, etc.

Report the number of physical units, including duplicates. For smaller libraries, if physical unit data are not available, count the number of titles. Items packaged together as a unit (e.g., two video cassettes for one movie) and checked out as a unit are counted as one physical unit.

## Licensed Databases

Report the number of licensed databases (including locally mounted or remote, full-text or not) for which temporary or permanent access rights have been acquired through payment by the library, or by formal agreement with the State Library or a cooperative agreement within the state or region. A database is a collection of electronically stored data or unit records (facts, bibliographic data, abstracts, texts) with a common user interface and software for the retrieval and manipulation of the data.

Note: The data or records are usually collected with a particular intent and relate to a defined topic. A database may be issued on CD-ROM, diskette, or other direct access method, or as a computer file accessed via dial-up methods or via the Internet. Subscriptions to individual electronic serial titles are reported under Current Electronic Serial Subscriptions (data element \#459). Each database is counted individually even if access to several databases is supported through the same vendor interface

Report the number of licensed databases acquired through payment or formal agreement, by source of access:

| 454* | Local |
| :--- | :--- |
| $455^{*}$ | State (state government <br> or state library) |
| $456^{*}$ | Other cooperative agreements <br> (or consortia) within state or <br> region |
| $457^{* *}$ | Total Licensed Databases | | This is the sum of Local, State, and Other licensed databases (data |
| :--- |
| elements \#454 through \#456). |

## Current Serial Subscriptions

Current serial subscriptions are arrangements by which, in return for a sum paid in advance, serials are provided for a specified number of issues. Include current serial subscriptions in print, electronic, and digital formats.

458** Current Print Serial Report the number of current print serial subscriptions, including Subscriptions duplicates, for all outlets. Examples of serials are periodicals (magazines), newspapers, annuals, some government documents, some reference tools, and numbered monographic series.

459** Current Electronic Serial Subscriptions

Report the number of current electronic, electronic and other format, and digital serial subscriptions (e-serials, e-journals), including duplicates, for all outlets. Examples include periodicals (magazines), news-papers, annuals, some government documents, some reference tools, and numbered monographic series distributed in the following ways: (a) via the Internet (e.g., HTML, PDF, JPEG, or compressed file formats such as zipped files), (b) on CD-ROM or other portable digital carrier, (c) on databases (including locally mounted databases), and (d) on diskettes or magnetic tapes. Electronic serial subscriptions include serials held locally or remote resources that the library has authorization to access, including those available through statewide or consortia agreements. Do not include subscriptions to indexing and abstracting databases that include full-text serial content (e.g., EBSCO Host,
ProQuest, OCLC FirstSearch).

## SERVICES

Public Service Hours Per Year This is the sum of annual public service hours for outlets.

501 Library Visits
Note: Include the hours open for public service for Centrals (data element \#209), Branches (data element \#210), Bookmobiles (data element \#211), and Books-by-Mail Only. For each bookmobile, count only the hours during which the bookmobile is open to the public. For administrative entities that offer ONLY books-by-mail service, count the hours that the outlet is staffed for service. Minor variations in scheduled public service hours need not be included, however, extensive hours closed to the public due to natural disasters or other events should be excluded even if the staff is scheduled to work.

This is the total number of persons entering the library for whatever purpose during the year.

Note: If an actual count of visits is unavailable, determine an annual estimate by counting visits during a typical week in October and multiplying the count by 52. A "typical week" is a time that is neither unusually busy nor unusually slow. Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).

551 Circulation of Children's Materials

## INTER-LIBRARY LOANS

A reference transaction is an information contact which involves the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. It includes information and referral services. Information sources include printed and non-printed materials, machine-readable databases, catalogs and other holdings records, and, through communication or referral, other libraries and institutions and people inside and outside the library. The request may come in person, by phone, by fax, or by mail, electronic mail, or through live or networked electronic reference service from an adult, a young adult, or a child.

Do not count directional transactions or questions of rules or policies. Examples of directional transactions are "Where are the children's books?" and "I'm looking for a book with the call number 811.2G." An example of a question of rules or policies is "Are you open until 9:00 tonight?"

Note: If an annual count of reference transactions is unavailable, determine an annual estimate by counting reference transactions during a typical week in October and multiply the count by 52. A "typical week" is a time that is neither unusually busy nor unusually slow. Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or in the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).

A registered borrower is a library user who has applied for and received an identification number or card from the public library that has established conditions under which the user may borrow library materials and gain access to other library resources. (Output Measures for Public Libraries, $2^{\text {nd }}$ edition).

Note: Files should have been purged within the past three (3) years.
The total annual circulation of all library materials of all types, including renewals.

Note: Count all materials in all formats that are charged out for use outside the library. Interlibrary loan transactions included are only items borrowed for users. Do not include items checked out to another library.

The total annual circulation of all children's materials in all formats to all users, including renewals.

These are library materials, or copies of the materials, provided by one autonomous library to another upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.

These are library materials, or copies of the materials, received by one autonomous library from another upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.

## LIBRARY PROGRAMS

Total Number of Library Programs

A program is any planned event which introduces the group attending to any of the broad range of library services or activities or which directly provides information to participants. Programs may cover use of the library, library services, or library tours. Programs may also provide cultural, recreational, or educational information, often designed to meet a specific social need. Examples of these types of programs include film showings, lectures, story hours, literacy, English as a second language, citizenship classes, and book discussions.

Count all programs, whether held on- or off-site, that are sponsored or cosponsored by the library. Exclude programs sponsored by other groups that use library facilities.

If programs are offered as a series, count each program in the series. For example, a film series offered once a week for eight weeks should be counted as eight programs.

Note: Exclude library activities delivered on a one-to-one basis, rather than to a group, such as one-to-one literacy tutoring, services to homebound, resume writing assistance, homework assistance, and mentoring activities.

A children's program is any planned event for which the primary audience is children and which introduces the group of children attending to any of the broad range of library services or activities for children or which directly provides information to participants. Children's programs may cover use of the library, library services, or library tours. Children's programs may also provide cultural, recreational, or educational information, often designed to meet a specific social need. Examples of these types of programs include story hours and summer reading events.

Count all children's programs, whether held on- or off-site, that are sponsored or co-sponsored by the library. Do not include children's programs sponsored by other groups that use library facilities. If children's programs are offered as a series, count each program in the series. For example, a story hour offered once a week, 48 weeks a year, should be counted as 48 programs. Exclude library activities for children delivered on a one-to-one basis, rather than to a group, such as one-to-one literacy tutoring, services to homebound, homework assistance, and mentoring activities. This figure is a subset of the Total Number of Library Programs (data element \#600).

Note: Output Measures for Public Library Services to Children: A Manual of Standardized Procedures (ALA, 1992) defines children as persons age 14 and under.

This is a total count of the audience at all library programs during the reporting period. (See Total Number of Library Programs, data element \#600, for the definition of a library program.)

The count of the audience at all programs for which the primary audience is children 14 years and under. Include adults who attend programs intended primarily for children.

Note: Do not count attendance at library activities for children that are delivered on a one-to-one basis, rather than to a group, such as one-to-one literacy tutoring, services to homebound, homework assistance, and mentoring activities. (See Number of Children's Programs, data element \#601, for the definition of a children's library program.)

Report the number of the library's Internet computers [personal computers (PCs) and laptops], whether purchased, leased, or donated, used by the general public in the library.

Report the total number of individuals that have used Internet computers in the library during the last year. If the computer is used for multiple purposes (Internet access, word-processing, OPAC, etc.) and Internet users cannot be isolated, report all usage. A typical week or other reliable estimate may be used to determine the annual number. Sign-up forms or Web-log tracking software also may provide a reliable count of users.

Note: The number of users may be counted manually, using registration logs. Count each user that uses public internet computers, regardless of the amount of time spent on the computer. A user who uses the library's public internet computer(s) three times a year would count as three customers. Software such as "Historian" can also be used to track the number of users at each public internet computer. If the data element is collected as a weekly figure, multiply that figure by 52 to annualize it.

[^13]
## Outlet Data Element Definitions

| \# | Data Element Name |
| :---: | :---: |
| 700 | FSCS ID and SEQ (Automatic Display) |
| 701 | LIB ID (Optional) |
| 702 | Name |
| 703 | Street Address |
| 704 | City |
| 705 | ZIP Code |
| 706 | ZIP+4 |
| 707 | County of the Outlet |
| 708 | Phone |

## Data Element Definition

This is the identification code assigned by WebPLUS. Outlets are assigned the same FSCS ID as the administrative entity to which they belong, with a unique three-digit suffix added to distinguish each outlet.

This is the state-assigned identification code for the outlet.
This is the legal name of the outlet.
Note: Provide the legal name of the outlet. Do not use acronyms. Do not abbreviate the name unless it exceeds the WebPLUS field length of 60 characters. Avoid abbreviations at the beginning of the name and do not punctuate abbreviations. (See Standard Abbreviations for WebPLUS in Appendix I.)

This is the complete street address of the outlet.
Note: Do not report a post office box or general delivery. For a bookmobile that operates from an administrative entity, branch, or central library, report the address of the administrative entity, branch or central library from which it operates. For a bookmobile that is itself the administrative entity, report the address where the bookmobile is parked at night.

This is the city or town in which the outlet is located.
This is the standard five-digit postal ZIP code for the street address of the outlet.

This is the four-digit postal ZIP code extension for the street address of the outlet.

This is the county in which the outlet is located.
This is the telephone number of the outlet, including area code.

Note: Report telephone number without spacing or punctuation. If the outlet has no phone, enter " -3 " (for Not Applicable).

An outlet is a unit of an administrative entity that provides direct public library service.

Select one of the following:
BM—Books-by-Mail Only. A direct mail order service which provides books and other library materials. Books-by-mail typically serves rural residents, the disabled, the homebound, and others without access to another type of public library outlet. Requests for materials are usually received by mail and by telephone only. Only books-by-mail services that are housed separately from any other type of direct public service outlet (that is, central library, branches, or bookmobiles) should be coded here.

BR-Branch Library. A branch library is an auxiliary unit of an administrative entity which has at least all of the following:

1. Separate quarters;
2. An organized collection of library materials;
3. Paid staff; and
4. Regularly scheduled hours for being open to the public.

BS—Bookmobile(s). A bookmobile is a traveling branch library. It consists of at least all of the following:

1. A truck or van that carries an organized collection of library materials;
2. A paid staff; and
3. Regularly scheduled hours (bookmobile stops) for being open to the public.

Note: A separate outlet record may be created for each bookmobile. You may wish to create separate outlet records for individual bookmobiles if (1) they have different addresses and/or (2) they have different Metropolitan Status Codes (see outlet data element \#710). Alternatively, a bookmobile outlet record may include more than one bookmobile.

CE-Central Library. This is one type of single outlet library (SO) or the library which is the operational center of a multiple-outlet library (MO or MA). Usually all processing is centralized here and the principal collections are housed here. Synonymous with main library.

Metropolitan Status Code

Square Footage of Outlet

Note: Each administrative entity may report either no central library or one central library. No administrative entity may report more than one central library. If you wish to identify a central library in the outlet file, identify the library with the largest collection as the central library, and report all others as branches. Where there are several co-equal outlets and no principal collection, report all such outlets as branches, not central libraries.

Select one of the following. Bookmobiles should report the code which best describes their primary service area.

Note: Contact the State Data Center for specific information about Metropolitan Areas in your state.

CC-Central City. The largest central city and, in some cases, up to two additional central cities are included in the title of the Metropolitan Area; there also are central cities that are not included in a Metropolitan Area title. A Metropolitan Area central city does not include any part of that city that extends outside the Metropolitan Area boundary.

NC-Metropolitan Area, but Not Within Central City Limits. A large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. Some Metropolitan Areas are defined around two or more nuclei. Each Metropolitan Area must contain a place with a minimum population of 50,000 or a Census Bureau-defined urbanized area and a total Metropolitan Area population of at least 100,000 (75,000 in New England). A Metropolitan Area comprises one or more central counties. (Independent cities are considered county equivalents.) A Metropolitan Area may also include one or more outlying counties that have close economic and social relationships with the central county. An outlying county must have a specified level of commuting to the central counties and also must meet certain standards regarding metropolitan character, such as population density, urban population, and population growth. In New England, Metropolitan Areas are composed of cities and towns rather than whole counties.

NO—Not in a Metropolitan Area.
Provide the area, in square feet, of the public library outlet (central library or branch). Report the total area in square feet for each library outlet (central library or branch) separately. This is the area on all floors enclosed by the outer walls of the library outlet. Include all areas occupied by the library outlet, including those areas off-limits to the public. Include any areas shared with another agency or agencies if the outlet has use of that area.

The number of bookmobiles in the bookmobile outlet record.

Note: A bookmobile outlet record may include one or more bookmobiles. Complete this data element only if the outlet record is of the type BSBookmobile(s) (see outlet data element \#709). A bookmobile is a traveling branch library. It consists of at least all of the following:

1. A truck or van that carries an organized collection of library materials;
2. A paid staff; and
3. Regularly scheduled hours (bookmobile stops) for being open to the public. Count vehicles in use, not the number of stops the vehicle makes.
(Page is intentionally blank.)

$\bullet \bullet 88$ INSTITUTE of
Musseummand Library SERVICES

[^0]:    ${ }^{1}$ The fiscal year reporting period varies among states and among local jurisdictions in some states. Please see Reporting Period in Appendix B for more information.
    ${ }^{2}$ No outlying areas responded to the FY 2007 survey, so they are not included in the tables of this report. The item response rates in the Total line of the tables do not include the outlying areas.

[^1]:    ${ }^{3}$ More detailed definitions of the terms used in this report can be found in the survey questionnaire in Appendix C

[^2]:    ${ }^{4}$ This was superseded by the National Education Statistics Act of 1994 (P.L. 103-382) and, more recently, by the Education Sciences Reform Act of 2002.

[^3]:    ${ }^{5} \mathrm{http}: / / \mathrm{www}$. measuringworth.com/uscompare/
    ${ }^{6}$ Of the 9,214 public libraries, 7,463 were single-outlet libraries and 1,751 were multiple-outlet libraries.
    ${ }^{7}$ See the glossary (Appendix C) for definitions of the terms used in this report.
    ${ }^{8}$ This percentage was derived by dividing the total unduplicated population of legal service areas for the 50 states and the District of Columbia by the sum of their official state total population estimates. The estimates were obtained from the State Data Center or other official state sources (Table 1). The percentage is based on unrounded data. (Also see Data File, Public Use: Public Libraries Survey: Fiscal Year 2007).

[^4]:    ${ }^{9}$ This and other percentage totals in the report may not sum to 100 percent because of rounding.
    ${ }^{10}$ Libraries that identify themselves as the headquarters of a federation or cooperative service are not included in the count of members of a federation or cooperative service.

[^5]:    ${ }^{11}$ The number of users (not uses) per year was reported on the survey. Survey respondents were instructed to count a user who uses the library's Internet computers three times a week as three users. In this table, "uses" was substituted for "users" for meaningful per capita comparisons as there cannot be more "users" than the population base.
    ${ }^{12}$ The average per stationary outlet was calculated by dividing the total number of public-use Internet terminals in central and branch outlets by the total number of such outlets. See Table 3 for the number of service outlets.

[^6]:    ${ }^{1}$ Per capita figures are based on the total unduplicated population of legal service areas (which excludes populations of unserved areas) in the 50 states and the District of Columbia, not on the state total population estimates.

[^7]:    ${ }^{14}$ This includes all expenditures other than those for staff and collection, such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs of computer hardware and software used to support library operations or to link to external networks, including the Internet. Includes expenditures for contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.
    ${ }^{15}$ Electronic materials expenditures: This includes all operating expenditures for electronic (digital) materials. Types of electronic materials include e-books, e-serials (including journals), government documents, databases (including locally mounted, full text or not), electronic files, reference tools, scores, maps, or pictures in electronic or digital format, including materials digitized by the library. Electronic materials can be distributed on magnetic tape, diskettes, computer software, CD-ROM, or other portable digital carrier, and can be accessed via a computer, via access to the Internet, or by using an e-book reader. Includes equipment expenditures that are inseparably bundled into the price of the information service product. Includes expenditures for materials held locally and for remote electronic materials for which permanent or temporary access rights have been acquired. Includes expenditures for database licenses.

[^8]:    ${ }^{1}$ Per capita is based on the total unduplicated population of legal service areas.

[^9]:    Response rate is the percentage of libraries that reported total operating expenditures. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table.

[^10]:    $\dagger$ Not applicable.
    ${ }^{1}$ This is the total number of single-outlet public libraries (centrals) on the public library outlet data file.

[^11]:    $\dagger$ Not applicable.
    ${ }^{1}$ Per 25,000 population is based on the total unduplicated population of legal service areas.
    ${ }^{2}$ The District of Columbia, while not a state, is included in the state rankings. Special care should be used in comparing its data to state data.
    ${ }^{3}$ Caution should also be used in making comparisons with the state of Hawaii, as Hawaii reports only one public library for the entire state. SOURCE: Institute of Museum and Library Services, Survey of Public Libraries in the United States, Fiscal Year 2007.
